DOT DOT SHIPPING NAME:

UN2920, Corrosive liquid, flammable, n.o.s. (Hydrochloric Acid, Quaternary Ammonium Compound, Ethanol), 8(3), PG II

STORAGE AND DISPOSAL

THOROUGHLY RINSE ALL MEASURING DEVICES AND STORE OUT OF REACH OF CHILDREN . Avoid contact with food or feed. Avoid storing near heat or open flame. Keep container tightly closed when not in use. Do not reuse empty container. Rinse container before disposing in safe manner.

FIRSTAID

In case of contact: Immediately flush eyes and skin with plenty of water for at least 15 minutes while immediately removing contaminated clothes and shoes. Get immediate medical attention. Wash clothes before reuse.

If swallowed: Do not induce vomiting. Give victim large amounts of milk or water. Get immediate medical attention. Never give anything by mouth to an unconscious person.

If inhaled: Immediately move victim to fresh air. Get medical attention.

Chem-trec Emergency Number

1-800-424-9300

DIRECTIONS FOR USE

4HOOVES is a synergetic mixture of a new generation of quaternary ammonium compounds and acid. 4HOO VES does not contain antibiotics, formaldehyde, copper sulfate or any other heavy metal. With a complete hoof management program, 4HOO VES is proven to reduce the prevalence and incidence of digital dermatitis.

Not for human use. Do not use at full strength. Read and follow label instructions carefully. Dilute according to directions below.

Consult a veterinarian for proper diagnosis of digital dermatitis before using this product. •

For best results, use this product as part of a complete hoof care program. •

USAGE AND DOSAGE INSTRUCTIONS

This product needs to be diluted with water and can be used in a footbath or as a spray. The use of pre-bath with Delaval Hoof Cleaner HC40 is highly recommended.

Footbath dilutions are based on treatment of 200 cows, after which it is recommended the footbath solution be discarded and replaced with fresh 4HOO VES footbath solution. For a 50 gallon footbath, mix thoroughly 0.5 gallons of 4HOO VES with 49.5 gallons of water (1% solution). For best results, use daily. If gallon capacity of footbath is unknown, use the following formula to calculate the volume of the footbath:

Inside Length (in.) x Inside Width (in.) x Fluid Height (in.) ÷ 231 = Gallon Capacity of Footbath

Spray-On Applications:

Prepare a fresh solution of 4HOO VES mixing thoroughly 1 oz with 39 oz of water (2.5% solution). Rinse hooves thoroughly with water or DeLaval Hoof Cleaner HC40 to remove mud and manure. Then thoroughly saturate each hoof and heel of the cow with the solution. Spray until favorable results are observed. Should solution become contaminated, discard and prepare fresh 4HOO VES spray-on solution.

Hoof Treatment Concentrate

For the reduction of prevalence and incidence of digital dermatitis (hairy heel warts), a significant cause of lameness in dairy cows.

Producto Concentrado Para Tratamiento De Patas

Para la reducción de la prevalencia e incidencia de la dermatitis digital, causa significativa de cojeras en vacas lecheras

CONTAINS: n-alkyl dimethyl benzyl ammonium chloride and didecyl dimethyl ammonium chloride, hydrochloric acid

OTHER INGREDIENTS: FDC Yellow #5
